MATHEMATICAL BIOSCIENCES
An International Journal

Published by American Elsevier Publishing Company, Inc.
52 Vanderbilt Avenue, New York, N.Y. 10017

1972: Volumes 13, 14, and 15
(issued in double numbers per volume:
in February, April; June, August; October, December).
$72.00
Volumes 1–12 (1967–1971)
$30.00 per volume

The publisher reserves the right to publish additional volumes (if warranted by the influx of accepted manuscripts) at prices to be announced.

Mathematical Biosciences

Volume 13
1972

an international journal

Contents:

RUTHERFORD ARIS (Minneapolis, Minnesota)
Mobility, Permeability, and the Pseudo-Steady-State Hypothesis 1

K. B. WOO (St. Louis, Missouri)
Control Characteristics of Regulatory Enzyme Systems, I: Nonlinearities in Regulatory Enzyme Activities 9

JEFFREY P. KRISCHER (Cambridge, Massachusetts)
Applications of Sequential Methods in Pattern Recognition to Diagnosis . 33

ALWYN C. SCOTT (Naples, Italy)
Transmission Line Equivalent for an Unmyelinated Nerve Axon . . . 47

JOSE M. GONZALEZ-FERNANDEZ AND SUSIE E. ATTA (Bethesda, Maryland)
Concentration of Oxygen Around Capillaries in Polygonal Regions of Supply 55

JOHN A. JACQUEZ (Ann Arbor, Michigan)
Models of Ion and Substrate Cotransport and the Effect of the Membrane Potential 71

P. J. STAFF AND M. K. VAGHOLKAR (Kensington, N.S.W., Australia)
Open Migration Systems With Uniform Inflow 95

A. G. PAKES (Clayton, Victoria, Australia)
A Limit Theorem for the Integral of a Critical Age-Dependent Branching Process 109

WILLIAM F. PICKARD (Saint Louis, Missouri)
A New Technique for Calculating the Potential of the Liquid Junction . . 113

J. RADCLIFFE (Leeds, England)
The Convergence of a Generalized Multiple Age-Dependent Branching Process with Poisson Immigration 125

LLOYD DEMETRIUS (Berkeley, California)
On an Infinite Population Matrix 133

H. MELVIN LIEBERSTEIN (Wichita, Kansas)
The Basilar Membrane as a Uniformly Loaded Plate Clamped on Two Spiral Boundaries in a Plane or on Two Helical-Spiral Boundaries: Relevance of the Species Record 139

COLIN W. CLARK (Vancouver, Canada)
The Dynamics of Commercially Exploited Natural Animal Populations . . 149

CHARLES J. MODE (Philadelphia, Pennsylvania)
Limit Theorems for Infinite Systems of Renewal Type Integral Equations Arising in Age-Dependent Branching Processes 165

R. B. MCGHEE AND A. K. JAIN (Columbus, Ohio)
Some Properties of Regularly Realizable Gait Matrices 179

PETER CLIFFORD AND AIDAN SUDBURY (Bristol, England)
The Markov Property of Impulse Interaction in Branching Nerve Fibres . 195

DAVID W. ROONEY (St. Louis, Missouri)
A Quantitative Study of Factors Affecting Algal Division Synchrony Measurements 205
LILA L. GATLIN (Berkeley, California)
The Entropy Maximum of Protein 213
STEPHEN W. BRADY (Wichita, Kansas)
The Integro-Differential Equation Form of a Hodgkin-Huxley Type System of Differential Equations 229
ELLEN A. CHERNIAVSKY AND HOWARD M. TAYLOR (Ithaca, New York)
Control of a General Lethal Growth Process 235
IRENE A. CHOW (Brooklyn, New York)
A Restricted Immigration and Death Process and its Application to the Distribution of Polymorphonuclear Granulocyte Density in Acute Leukemia 253
R. H. DAVIS AND J. H. OTTAWAY (Edinburgh, Scotland)
Application of Optimization Procedures to Tracer Kinetic Data 265
THEO C. PILKINGTON (Durham, North Carolina)
Relationship Between Orthonormal Temporal and Spatial Electrocardiographic Generators 283
J. S. ULTMAN (Minneapolis, Minnesota)
Analysis of Osmotic Hemolysis of Erythrocytes Including Mechanical and Transport Effects 287
D. W. FAIRWEATHER AND I. N. SHIMI (Tallahassee, Florida)
A Multi-Type Branching Process with Immigration and Random Environment 299
A. S. PAULSON (Knoxville, Tennessee) AND V. R. R. UPPULURI (Oak Ridge, Tennessee)
Limit Laws of a Sequence Determined by a Random Difference Equation Governing a One-Compartment System 325
A. HELFGOTT, E. O. TUCK, R. J. CRAIG AND P. S. HETZEL (Adelaide, South Australia)
A Simple Mathematical Model of Muscle-Induced Ejection Flows. . . . 335
H. W. HSU (Knoxville, Tennessee)
Transport Phenomena in Zonal Centrifuge Rotors IV. Stability of Isopycnic Banding 361
J. A. KELMAN (Providence, Rhode Island) AND L. D. HOMER (Bethesda, Maryland)
The Analysis of Pulmonary and Cardiovascular Parameters with a Mathematical Model of External Respiration 369
T. T. SOONG (Los Angeles, California)
Pharmacokinetics with Uncertainties in Rate Constants—II. Sensitivity Analysis and Optimal Dosage Control 391
RALPH NOSSAL (Bethesda, Maryland)
Boundary Movement of Chemotactic Bacterial Populations 397

Mathematical Biosciences

Volume 14· 1972

an international journal

Contents:

WILLIAM F. PICKARD AND CHARLES J. PUCCIA (Saint Louis, Missouri)
A Theory of the Steady-State Heat Step Method of Measuring Water Flux in Woody Plant Stems 1

ROGER W. JELLIFFE AND SUSAN M. JELLIFFE (Los Angeles, California)
A Computer Program for Estimation of Creatinine Clearance from Unstable Serum Creatinine Levels, Age, Sex, and Weight 17

T. W. BARRETT (Memphis, Tennessee)
An Information Analysis of the Auditory Localization of a Lateral Sound Source 25

J. RADCLIFFE (Leeds, England)
The Convergence of a Super-critical Age-dependent Branching Process Allowing Immigration at the Epochs of a Renewal Process 37

RICHARD BELLMAN (Los Angeles, California)
Topics in Pharmacokinetics—IV: Approximation in Process Space and Fitting by Sums of Exponentials 45

A. N. POKROVSKY (Novosibirsk, USSR)
Non-Homogeneous Renewal Point Process as a Model of a Neuronal Spike Train 49

DAVID W. ROONEY (St Louis, Missouri)
Synchrony Indices Based on Computer-Corrected Algal Cell Data . . . 59

G. L. YANG (College Park, Maryland)
Empirical Study of a Non-Markovian Epidemic Model 65

V. MARPLES (Warwick, England)
On the Functional Significance of Some Geometrical Parameters of Hair Cell Cilia Arrays 85

C. FARMER AND J. B. BEDNAR (Tulsa, Oklahoma)
Stability of Spatial Digital Filters 113

JOHN Z. HEARON AND WAYNE P. LONDON (Bethesda, Maryland)
Path Lengths and Initial Derivatives in Arbitrary and Hessenberg Compartmental Systems 121

[contd.

JOHN Z. HEARON (Bethesda, Maryland)
Compartmental Matrices with Single Root and Nonnegative Nilpotent Matrices 135

CHARLES J. MODE AND DAVID L. GASSER (Philadelphia, Pennsylvania)
A Distribution Free Test for Major Gene Differences in Quantitative Inheritance 143

ROBERT ROSEN (Buffalo, New York)
Autonomous State Classifications by Dynamical Systems 151

S. P. AZEN AND A. A. AFIFI (Los Angeles, California)
Two Models for Assessing Prognosis on the Basis of Successive Observations 169

WILL GERSCH (Honolulu, Hawaii)
Causality or Driving in Electrophysiological Signal Analysis 177

JAMES A. ANDERSON (New York)
A Simple Neural Network Generating an Interactive Memory 197

A. G. PAKES (Victoria, Australia)
Limit Theorems for An Age-Dependent Branching Process with Immigration. 221

R. BELLMAN, S. UENO AND R. VASUDEVAN (Los Angeles, California)
Invariant Imbedding and Radiation Dosimetry: Finite Order Scattering and Transmission Function 235

N. HARRIS MCCLAMROCH (Ann Arbor, Michigan)
Functional Differential Equations and Age Dependent Population Growth 255

WAYNE P. LONDON AND JOHN Z. HEARON (Bethesda, Maryland)
Estimation of the Number of Precursors in a Sequence of First Order Reactions 281

LLOYD DEMETRIUS (Berkeley, California)
On Gene Regulation, A Mathematical Model. I 297

ROBERT ROSEN (Buffalo, New York)
Further Comments on Autonomous State Classifiers and an Application to Genetics 305

DANIEL FIFE (Ann Arbor, Michigan)
Which Linear Compartmental Systems Contain Traps? 311

J. F. OSTERLE (Pittsburgh, Pennsylvania) AND J. G. MCGOWAN (Amherst, Massachusetts)
The Bionic Relationship Between Transpiration in Vascular Plants and the Heat Pipe 317

TAKEO MARUYAMA (Mishima, Japan)
The Rate of Decay of Genetic Variability in Geographically Structured Finite Population 325

SHUNJI OSAKI AND R. VASUDEVAN (Los Angeles, California)
On a Model of Neuronal Spike Trains 337

ROBERT N. STILES AND DAVID M. ALEXANDER (Memphis, Tennessee)
A Viscoelastic-Mass Model for Muscle 343

MARIO DAL CIN (Tübingen, Germany)
Cofunction in Composite Systems 355

REINHARDT M. ROSENBERG, CHI H. CHAO, AND JOSEPH ABBOTT (Berkeley, California)
A New Mathematical Model of Electrical Cardiac Activity 367

Contents:

M. Vukobratović (Beograd, Yugoslavia) and J. Stepanenko (Moscow, USSR)
On the Stability of Anthropomorphic Systems 1

Stephen Grossberg (Cambridge, Massachusetts)
A Neural Theory of Punishment and Avoidance, I: Qualitative Theory . 39

John Z. Hearon (Bethesda, Maryland)
Residence Times in Compartmental Systems and the Moments of a Certain Distribution 69

D. Kannan (Athens, Georgia)
On Enzyme Amplifier Systems Triggered by White Noise 79

C. K. Chow and D. H. Jacobson (Cambridge, Massachusetts)
Further Studies of Human Locomotion: Postural Stability and Control . 93

Lynn O. Wilson (Murray Hill, New Jersey)
An Epidemic Model Involving a Threshold 109

Edward Pollak (Ames, Iowa)
The Asymptotic Form of the Extinction Probabilities for Supercritical Multitype Branching Processes 123

K. E. Lonngren and H. C. S. Hsuan (Iowa City, Iowa)
On the Response of a Nerve to a Sub-threshold Stimulus—A Self Similar Approach 133

David M. Shaw, Anthony L. Johnson, and Richard Short (Carshalton, Surrey, England)
Preliminary Study of the Effects of Lithium, Imipramine, and Reserpine on the Relative Sizes of Tryptophan Pools and Flow Constants in Rabbits . . 137

R. Bellman, S. Ueno, and R. Vasudevan (Los Angeles, California)
Invariant Imbedding and Radiation Dosimetry: II. Integral Recurrence Relations for the Finite Order Scattering and Transmission Functions . . 153

Kara S. Bennett and Howard S. Barrows (Los Angeles, California)
An Investigation of the Diagnostic Problem Solving Methods Used by Resident Neurologists 163

N. G. F. Sancho (Montreal, Quebec)
Optimal Drug Administration for the Control of Certain Cholesterol Fats in the Blood System 183

[contd.

KENNETH M. COLBY, FRANKLIN D. HILF, SYLVIA WEBER, AND HELENA KRAEMER (Stanford, California)
Experimental Validation of a Computer Simulation of Paranoid Processes . 187

Erratum 193

R. BELLMAN, S. UENO AND R. VASUDEVAN (Los Angeles, California)
Invariant Imbedding and Radiation Dosimetry—III: Integral Recurrence Relations for Finite Order X and Y Functions. 195

TIMOTHY R. BROWN (Los Angeles, California)
A Comparison of Judgment Policy Equations Obtained from Human Judges Under Natural and Contrived Conditions 205

DAVID L. JAQUETTE (Los Angeles, California)
A Discrete Time Population Control Model 231

STEPHEN GROSSBERG (Cambridge, Massachusetts)
A Neural Theory of Punishment and Avoidance, II: Quantitative Theory . 253

D. A. DAWSON (Ottawa, Ontario, Canada)
Stochastic Evolution Equations 287

JUNG-KEUN LEE AND MILTON SOBEL (Minneapolis, Minnesota)
Dorfman and R_1-Type Procedures for a Generalized Group-Testing Problem 317

A. C. TRAJSTMAN (Clayton, Victoria, Australia)
Probabilities and Rates of Fixation for a Population with a General Fertility Distribution. 341

F. BOUTROS-TONI AND J. DUHAMEL (Bordeaux, France)
Peut-On Parler D'Une Biologie Moleculaire Statistique? 357

Author Index to Volume 15. 379
